

# Simple Way to Assure Customer's Network Experience

## Aruba User Experience Insight

Aruba User Experience Insight automates application performance assessment and proactively augments IT's skills to assure amazing end-user experiences. User Experience Insight provides actionable user-perspective insights by testing network and application availability and performance by simulating how people use a network. Purpose-built user experience sensors behave like clients. They connect to wired and wireless networks and perform custom specified tests including application (on premise and cloud) and network services.

Aruba User Experience Insight is vendor agnostic. The ability to deploy the solution in any network (wired and/or wireless) delivers value for all customers, of any size, in any industry.

### Key Features and Benefits:

- Simplicity of deployment, administration, and use of its dashboard.
- Automated assessment of WLAN, LAN and WAN performance to internal and external apps.
- Cloud-based software includes an intuitive dashboard designed for use with little or no training.
- Scales to any number of sensors on main and satellite campuses.

### Customer Benefits:

- Customer will Get Free F Sensor with purchase of 3/5 years subscription.
- Offer is valid from 1st November 2021 to 31st January 2022
